

# HIGH PRESSURE WASHER

The high pressure washer is especially developed for the processing of fresh mussels.

This high pressure washer removes seaweed, tunicates etc. and cleans the mussels by means of a large quantity of high pressure nozzles that spray the product.

The machine consists of a sorting function as well by means of a barrel. This barrel takes out the mussels that are smaller than the rod distance, which is selected at order by customer.

## seafood solutions

Developed by  
**Murre Technologies**

## Specifications

### Machine

**NAME** High pressure washer

### Specifications

**CAPACITY** 8,800 lbs per hour  
(based on ± 45 - 70 mussels per lb)

**LENGTH** 118"

**WIDTH** 59"

**HEIGHT** 69"
